Profile & Motivation

- I am a **Full Stack Developer** who is very passionate about application development. I have more than **7 years of professional experience** of working in Software Industry.
- I am a seasoned professional, who has the ability to conceptualize, design & implement great products that cater to its fundamental goals. I have helped build products predominantly in Banking, Finance, Securities and Audit domain.
- I am most comfortable in web development and aspire to continue to contribute in building amazing products that provides me with professional and personal gratification.

Professional Experience

Senior Software Engineer, Hexaware Technologies, Mumbai, India
January 2019 – Present

- Joined as Senior Engineer, was assigned to work on products in audit and compliance domain for Ernst & Young (US)
- Currently working on an application that helps Ernst & Young to pass on their audit related information to the regulatory authorities in the United States. (PCAOB)
- Good exposure to Agile Scrum methodology.
- Learned **Backbone.js** and **Marionette.js** on the go.
- Participated across all the agile ceremonies including Sprint Review, Sprint Retrospective and Sprint Planning.
- Implemented **SignalR** to have real-time data consistency across multiple applications.
- Role includes end to end development:
    - **Frontend** – Angular, Backbone.js, JavaScript
    - **Backend (REST APIs)** – Web APIs using ASP.NET Core
    - **Database** – MS SQL Server 2016

Senior Software Engineer, Vara United Pvt Ltd, Mumbai, India
August 2016 – January 2019

- Roles and Responsibilities at Vara United Pvt Ltd were same as with 3I Infotech Limited (listed below)
- Was moved internally to this new Entity in August 2016.

Senior Software Engineer, 3I InfoTech Limited, Mumbai, India
November 2014 – July 2016

- Joined as Software Engineer and was later promoted to Senior Software Engineer.
- Got to work on very large and important Foreign Exchange Trading applications for one of the biggest private sector bank in India.
- Got opportunity to plan, design and implement multiple medium size projects.
- First taste of leading a small team of 3-4 developers.
- Excellent exposure to **Application Level Security** as we were building applications for financial trading.

Software Developer, Sudesi Infotech, Navi Mumbai, India
April 2013 – November 2014

As a Software Developer at Sudesi InfoTech, I worked on a small team in a startup environment. My responsibilities included:

- Working with stakeholders to gather functional and technical requirements.
- Implementing solutions through coding and getting it reviewed by the lead.
- Had good opportunity to learn deployment and IIS configuration.
- Excellent exposure to interacting with the customer and understanding their needs.
